Operations, Management and Quality Assurance

PROFESSIONAL EXPERIENCE

Summary: I have spent most of my career in the Energy Sector. Building and inspecting pipelines, compressor stations, and major facilities. My daily goal is to improve our industry through accountability, honesty and integrity. Striving to be relevant, relatable and reliable in a fast-changing market.

Team Inc, Tulsa, OK – 2024-Present

Operations Manager, Asset Integrity Pipeline & Tank, Focus on Business Development to increase market share and service areas. Developed strategic partnerships with clients and competitors. Positively changed office structure to better support staff and leadership goals. Worked with technicians/technical staff to open communications and create training opportunities. Addressed client/customer relations, concerns and needs.

ZEVAC, Tulsa, OK – 2023-2024

Quality Engineer, Focus on Quality department development and build out, QMS implementation and monitoring. Developed strategic partnerships with clients and stakeholders to advance technology and quality improvements. Positively changed office structure to better support staff and leadership goals. Worked with shop/mechanic staff to open communication and create training opportunities. Developed plan for Class1 Div1 and ISO compliance. Addressed client/customer concerns and documentation needs.

Campos EPC, Tulsa, OK 2022-2023

Area Manager Was relocated to Oklahoma to open a new territory office to support growing business partners based in Houston, TX. Facilitated business development activities, networking events and lunch and learns to build interest. Managed projects exceeding 20 million for multiple major utilities. Supported a team of remote workers across our service area to support local needs while we hired local talent. Developed training and compliance activities for staff. Developed budgets and predictions based on local market team input.

Acuren, Denver, CO – 2021 – 2022

Operations Manager, Focus on Business Development to increase market share and service areas. Developed strategic partnerships with clients and competitors. Improved P&L statement from 3 million to 8 million gross in 7 months. Structured training program to advance technicians. Started quarterly 1on1's to track progression of staff. Positively changed office structure to better support staff and leadership goals.

WSB & Associates, Inc. Denver, CO - 2020 - 2021

Project Manager, Oil & Gas Field Service (Pipeline Group)
Manage High Pressure/Transmission/IMP inspection group for Colorado as well as WSB's entire service area. Served as SME for WSB and our strategic partners relating to welding and steel. Focus on Business Development to increase market share and service areas. Developed strategic partnerships with clients and competitors. Worked tirelessly to improve the inspection industry. Developed client relations while adding several new clients.

Pipeliners Union 798 – Tulsa, OK 2008 – Present

Welder Foreman, Steward and Superintendent – Tie in and Fabrication Specialist
Worked in all phases of pipeline construction as a welder, foreman and steward. Managed small to large crews on mainline and fabrication. Specializing in Integrity and Anomaly work. Managed manhours and assets to facilitate budget and safety concerns along with scheduling requirements of staff up to 125 people.

Applied Consultants, Inc. – Various Locations - 2015 – 2019

Chief Inspector/Assistant Chief/Construction Manager
Managed and coordinated all construction activities. Maintained schedules and budget of my inspection staff as well as the construction contractor. Verified all inspector and contractor credentials and operator qualifications. Managed and all team meetings. Arbitrated any disagreements and resolved conflicts based on client standards. Insured all construction was performed in compliance of the construction standards. Built and assembled all reporting and documentation into organized "Job Books".
