Operations, Management and Quality Assurance

PROFESSIONAL EXPERIENCE

Summary: I have spent most of my career in the Energy Sector. Building and inspecting pipelines, compressor stations, and major facilities. My daily goal is to improve our industry through accountability, honesty and integrity. Striving to be relevant, relatable and reliable in a fast-changing market.

Campos EPC, Tulsa, OK 2022 – Present

Area Manager, Responsible for opening a new office. Built business plan for area that aligned with our regional plans. Developed strategy for staffing and business development. Networked with existing and new clients determining needs and territories. Integrated strategic partnerships with clients and competitors. Participated in leadership meetings to provide direction and personal accountability. Worked cooperatively with a staff of nearly 800.

Xcel Energy, Platteville, CO 2022 – 2022

Operations Manager, Fort St. Vrain Power Generation. Responsible for daily and outage operations of largest facility in PSCo. Operated five gas burning turbines and one steam turbine. Responsible for a crew of 36 full time employees and trades people. Coordination of contractor crews and personnel during outages. Approved time and expenses and built forecast budgets into 2025. Requested accounting to do field walks with FSV team to learn how and why we needed budgetary support. Maintained training for all staff and added critical areas based on team input.

Acuren, Denver, CO – 2021 – 2022

Operations Manager, Focus on Business Development to increase market share and service areas. Developed strategic partnerships with clients. Improved P&L statement from 3 million to 8 million gross in 7 months. Structured training program to advance technicians. Started quarterly 1on1's to track progression of staff. Positively changed office structure to better support staff and leadership goals. Managed a team of 75+ staff members.

WSB & Associates, Inc. Denver, CO - 2020 - 2021

Project Manager, Oil & Gas Field Service (Pipeline Group)

Manage High Pressure/Transmission/IMP inspection group for Colorado as well as WSB's entire service area. Served as SME for WSB and our strategic partners relating to welding and steel. Focus on Business Development to increase market share and service areas. Developed strategic partnerships with clients and competitors. Worked tirelessly to improve the inspection industry. Developed client relations while adding several new clients. Managed inspection team of 120+ individuals.

Xcel Energy – Denver, CO 2019 – 2020

Gas Governance – QA/QC Specialist, High Pressure/Transmission/Integrity Management Project Manager of 3rd party inspection contractors. Facilitate cooperative communication between Inspection contractors and Construction contractors. I helped to build out the CQWIP (Contractor Quality Work Inspection Program) to its current state. I worked on developing functional relationships with all of our contractors as well as between the internal departments at Xcel. I helped to foster a team environment within our group at Xcel.

Pipeliners Union 798 – Tulsa, OK 2008 – Present

Welder Foreman, Steward and Superintendent – Tie in and Fabrication Specialist

Worked in all phases of pipeline construction as a welder, foreman and steward. Managed small to large crews on mainline and fabrication. Specializing in Integrity and Anomaly work. Managed manhours and assets to facilitate budget and safety concerns along with scheduling requirements of staff up to 125 people.

Applied Consultants, Inc. – Various Locations - 2015 – 2019

Chief Inspector/Assistant Chief

Managed and coordinated all construction activities. Maintained schedules and budget of my inspection staff as well as the construction contractor. Verified all inspector and contractor credentials and operator qualifications. Managed and all team meetings. Arbitrated any disagreements and resolved conflicts based on client standards. Insured all construction was performed in compliance of the construction standards. Built and assembled all reporting and documentation into organized "Job Books".

Circle S Industries, Inc. - OKC, OK 2000 – 2008

Owner

Industrial welding and fabrication contractor. Built from design piping and vessels to code. Provided field modifications to existing piping systems and vessels. Maintained budget and scheduling for up to 20 rig welders. Maintained operator qualification compliance for all employees to client guidelines. Designed, built and maintained nine mud/gas separators for drilling clients.
